Understanding Cryptography

Chapter 10b

SHA-3 or: The Hash Function Keccak

ver. Jun 18, 2013

These slides were prepared by Christof Paar

## Some legal stuff (sorry): Terms of Use

- The slides can used free of charge. All copyrights for the slides remain with Christof Paar and Jan Pelzl.
- The title of the accompanying book "Understanding Cryptography" by Springer and the author's names must remain on each slide.
- If the slides are modified, appropriate credits to the book authors and the book title must remain within the slides.
- It is not permitted to reproduce parts or all of the slides in printed form whatsoever without written consent by the authors.

|                         |  |  |  |  |  |
|                         |  |  |  |  |  |
|                         |  |  |  |  |  |
|                         |  |  |  |  |  |
|                         |  |  |  |  |  |

Fig.. 1.2 Absorbing and squeezing phase of Keccak

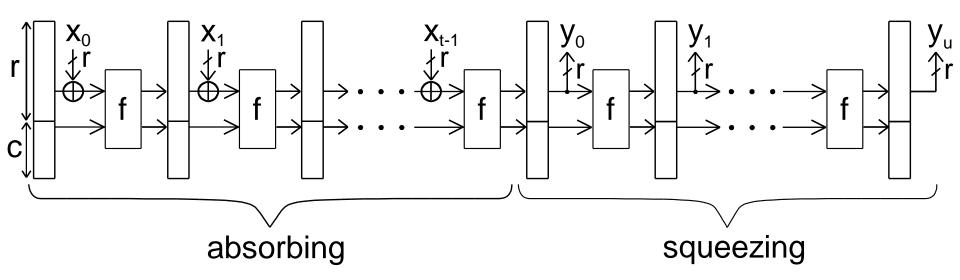

Fig. 1.3 The internal structure of Keccak

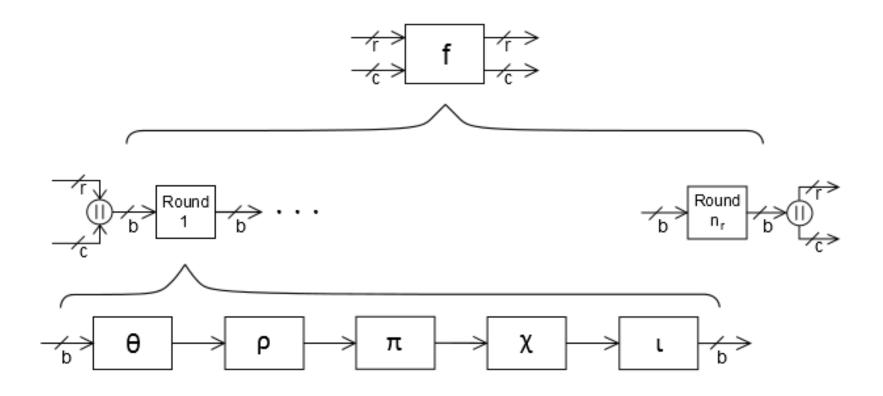

Fig. 1.4 The state of Keccak

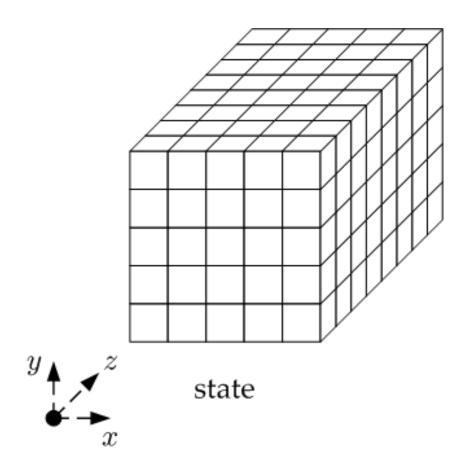

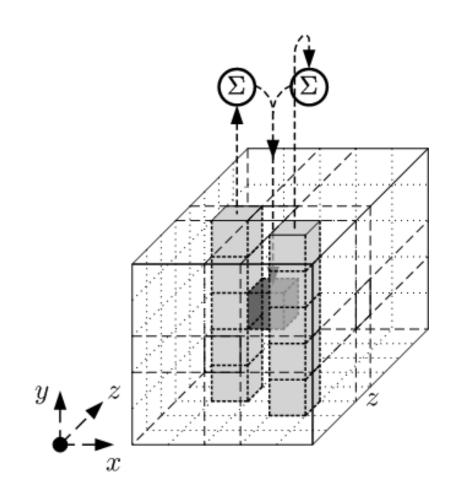

Fig. 1.5 The Theta Step of Keccak – visually

## Fig. 1.5 The Theta Step of Keccak – pseudo code

- Input: state array A[x,y]
- Output: manipulated state array A[x,y]

$$^{\bullet}$$
C[x] = A[x,0]  $\oplus$  A[x,1]  $\oplus$  A[x,2]  $\oplus$  A[x,3]  $\oplus$  A[x,4]

$$x = 0...4$$

$$D[x] = C[x-1] \oplus rot(C[x+1],1)$$

$$x = 0...4$$

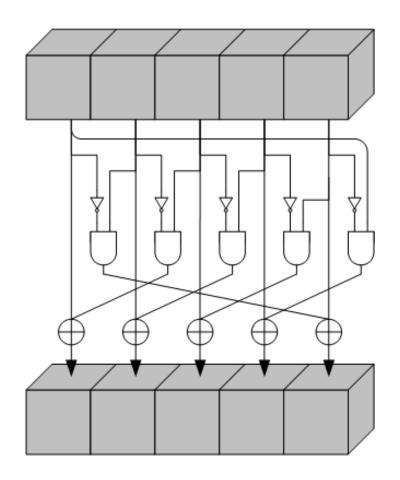

$$^{\bullet}A[x,y] = A[x,y] \oplus D[x]$$

$$x,y = 0...4$$

**Table 1.3 The rotation constants of Keccak** 

|             | x = 3 | x = 4 | $\mathbf{x} = 0$ | $\mathbf{x} = 1$ | x = 2 |
|-------------|-------|-------|------------------|------------------|-------|
| <u>y=2</u>  | 25    | 39    | 3                | 10               | 43    |
| y=1         | 55    | 20    | 36               | 44               | 6     |
| y=0         | 28    | 27    | 0                | 1                | 62    |
| y=4         | 56    | 14    | 18               | 2                | 61    |
| <b>y=</b> 3 | 21    | 8     | 41               | 45               | 15    |
